Tire size	ST225/75R15D

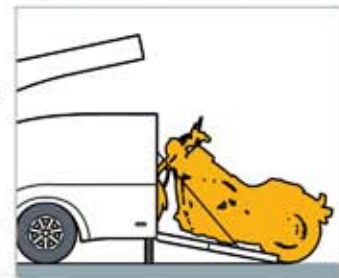

WideBody

User friendly

Flip-up top and low floor height makes loading a breeze. Integral, full-width counterbalanced ramp gives you confidence when riding your bike in.

Light weight body, large wheels and rolling front jack allow one person to easily maneuver the trailer for hitching.

Stress-free towing

The aerodynamic design offers stable, hassle-free towing without the stress of buffeting and "fishtailing" often experienced with box shaped trailers. Superior mpg is another benefit of the sleek shape. Correct weight distribution and independent suspension give a smooth, level ride.

These features mean you can concentrate on driving, not stress about what's happening "back there!"

Great looking

A high gloss finish, polished aluminum wheels and a distinctive shape give Ironhorse trailers a luxurious look backed by superior quality. A trailer you will be proud to hitch behind your tow vehicle!

In addition to the standard white color, optional custom finishes are available like the trailer shown below.

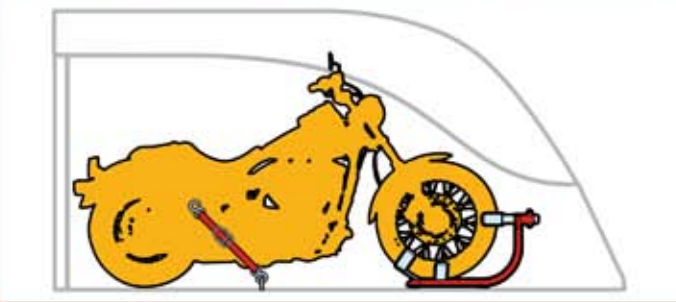

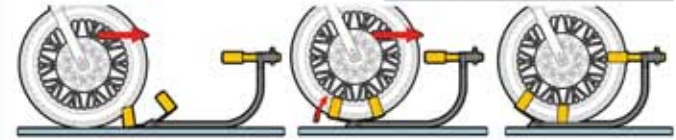

Security & Protection

A dead bolt locking tailgate and weatherproof body protect your valuable cargo.

Built in vents eliminate the build-up of dangerous fumes.

Ironhorse wheel chock and lock down system ensures your bike or trike will arrive undamaged.

Versatile design

Integral stabilizer jacks enable you to load and unload without being hitched to a tow vehicle. This feature also allows you to use your Ironhorse trailer as a weatherproof, lockable garage.
